MONTHLY CHARGES (CONTINUED).

* **Capacity Charge (Continued)**

Where:

MCC = Monthly Capacity Charge, in $/kW-Month, applied to the Capacity Obligation established by the retail customer for the monthly billing period.

NLP = Applicable PJM Net Load Price, in $/MW-Day, for the period of time corresponding to the monthly billing periods during which the MCC is applied.

BUF = Base Uncollectible Cost Factor, in decimal format, equal to the system average Supply BUF ($SBUF_{sys}$) listed in or determined in accordance with the provisions of Rider UF - Uncollectible Factors (Rider UF), as applicable.

ISUF = Incremental Supply Uncollectible Cost Factor, in decimal format, equal to $ISUF_{SYS}$ determined in accordance with the provisions of Rider UF.

Notwithstanding the preceding provisions for the computation of MCC, for computations that pertain to leap years, the number of days in the year is 366 rather than 365.

Hourly Energy Charges

Each Hourly Energy Charge (HEC) is applicable to each kWh provided to the retail customer during the hour in the monthly billing period for which such charge is determined. Each such HEC is determined in accordance with the following equation:

$$HEC = LMP \times \frac{1\,MWh}{1{,}000\ kWh} \times BUF \times ISUF \times (1 + DLF)$$

Where:

HEC = Hourly Energy Charge, in $/kWh, applied to each kWh provided to the retail customer during the hour in the monthly billing period for which such charge is determined.

LMP = The PJM real time residual locational marginal price for the ComEd Zone, in $/MWh, for the hour corresponding to the hour during which the HEC is applied.

DLF = Distribution Loss Factor, in decimal format, to adjust for losses on the distribution system located in the Company's service territory and equal to the applicable system average DLF provided in Informational Sheet No. 33.

MONTHLY CHARGES (CONTINUED).

PJM Services Charge

* The PJM Services Charge, in the structure defined in this subsection, shall be effective through the December 2026 monthly billing period.

The PJM Services Charge is applicable to each kWh provided to the retail customer during the monthly billing period. The application of the PJM Services Charge allows the Company to recover from retail customers receiving electric service with hourly pricing the costs it incurs in procuring certain services from PJM, including but not limited to, NITS and other PJM-associated expenses incurred in accordance with applicable tariffs on file with the FERC, and other applicable law. The Company is not allowed to mark-up or include a return on such costs. Such services are the same as those procured in accordance with the provisions of the PJM Services Price section of Rider PE - Purchased Electricity (Rider PE). The PJM Services Charge is developed using the electricity usage expected to be provided to retail customers receiving electric service with hourly pricing for a period of twelve (12) monthly billing periods extending from the start of a June monthly billing period and through the following May monthly billing period. The PJM Services Charge is shown as a separate line item on the retail customer's monthly bill for electric service and designated as the Transmission Services Charge.

The PJM Services Charge is determined by the Company each year and is generally applicable for the period that extends from the beginning of the June monthly billing period through the end of the following May monthly billing period. Included in the determination of the PJM Services Charge are applicable system losses, base uncollectible costs, and incremental uncollectible costs incurred by the Company.

Notwithstanding the previous provisions of this PJM Services Charge subsection, in the event that the Company (a) recomputes the PJM Services Price (PSP) and revises the Retail PJM Services Charge in accordance with the provisions of Rider PE or (b) revises base uncollectible costs or incremental uncollectible costs included in the determination of the PJM Services Charge, then the PJM Services Charge for service with hourly pricing must be correspondingly revised.

Miscellaneous Procurement Components Charge

* The Miscellaneous Procurement Components Charge, in the structure identified in this subsection, shall be effective through the December 2026 monthly billing period.

The Miscellaneous Procurement Components Charge is applicable to each kWh provided to the retail customer during the monthly billing period. The Company determines a Miscellaneous Procurement Components Charge in a manner that allows the Company to recover the costs it incurs related to the procurement of electric power and energy directly from PJM-administered markets for retail customers receiving electric service with hourly pricing which are not recovered through the application of the MCC, the HECs, and the PJM Services Charge.

RENEWABLE ENERGY RESOURCES AND
COAL TECHNOLOGY DEVELOPMENT ASSISTANCE CHARGE.

Pursuant to the provisions of the Renewable Energy, Energy Efficiency, and Coal Resources Development Law of 1997, enacted on December 16, 1997, authorizing the assessment of charges for renewable energy resources and coal technology development assistance on retail customers' monthly bills for electric service, and as amended on August 20, 2021, the Company includes the following Renewable Energy Resources and Coal Technology Development Assistance Charge, as applicable, on each retail customer's monthly bill:

For a residential retail customer	$0.05
For any other retail customer	
If such retail customer's highest demand during the previous calendar year was less than 10,000 kilowatts (kWs)	$0.50
If such retail customer's highest demand during the previous calendar year was at least 10,000 kWs	$37.50

* The Renewable Energy Resources and Coal Technology Development Assistance Charge is assessed through December 31, 2030, in accordance with Illinois Public Act 104-10.

RESIDENTIAL REAL TIME PRICING PROGRAM COST RECOVERY CHARGES.
Pursuant to subsection 16-107(b-25) of the Act and the Illinois Commerce Commission's (ICC's) Order in Docket No. 11-0546, authorizing the Company to recover the reasonable costs it incurs in complying with Section 16-107 of the Act, the Company includes the following Residential Real Time Pricing Program Cost Recovery Charges (RRTPCRCs), on each retail customer's monthly bill, as applicable:

For Bills Issued Beginning with the July 2012 Monthly Billing Period and	
Extending Through the December 2015 Monthly Billing Period	RRTPCRC
For a residential retail customer	$0.04
Additionally, for a residential retail customer served under	
Rider RRTP - Residential Real Time Pricing Program (Rider RRTP)	$0.39
For Bills Issued Beginning with the January 2016 Monthly Billing Period and	RRTPCRC
Extending Through the January 2018 Monthly Billing Period	
For a residential retail customer	$0.04
Additionally, for a residential retail customer served under Rider RRTP	$0.39
For Bills Issued Beginning with the February 2018 Monthly Billing Period	RRTPCRC
For a residential retail customer	$0.06

Notwithstanding any other provision of this rider, such RRTPCRCs are included on monthly bills until Rider RRTP is terminated.

PURCHASE OF RECEIVABLES ADJUSTMENT.
Pursuant to Section 16-118(c) of the Act, authorizing the recovery of the Company's prudently incurred costs associated with the provision of services in accordance with such Section 16-118(c), the Company includes a Purchase of Receivables (POR) Adjustment on retail customer monthly bills, as applicable, determined in accordance with the following equation:

$$\text{POR Adjustment} = \frac{\text{POR Balance} + \text{PORBF} + \text{POROR}}{EB_{POR}}$$

Where:

POR Adjustment = Purchase of Receivables (POR) Adjustment, in $ rounded to the cent, included on retail customers' monthly bills, as applicable. The POR Adjustment during the initial POR Application Period, as described in Rider PORCB - Purchase of Receivables with Consolidated Billing (Rider PORCB) is zero (0). The POR Adjustment is zero (0) for the first three (3) monthly billing periods of any subsequent POR Application Period.

POR Balance = Purchase of Receivables Balance, in $, equal to the (a) unrecovered portion of the accrued Developmental and Implementation Costs (DICs) and accrued Administrative and Operating Costs (AOCs) intended to be recovered through the remittance of Discounted Receivables ($DREC_{CS}$s) during the previous POR Application Period under Rider PORCB; or (b) excess amount, or applicable portion of such excess amount, recovered through the remittance of $DREC_{CS}$s during the previous POR Application Period under Rider PORCB to provide reimbursement to retail customers for amounts previously recovered from retail customers through the application of POR Adjustments that were charges.
